

I am requesting the FCC consider not overriding the Telephone Privacy Law that the State of Indiana has instituted under Steve Carter, Attorney General.

Since the new law my home phone has been quiet in the evening hours when I am home with my family. For this I am very grateful. I was getting a number of calls in a week and it was very annoying.

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Thank you for reading and considering my comments.
